SUMMARY

My expertise spans across frontend development majorly with intermediate backend development experience, utilizing technologies such as React, Typescript, TailwindCSS, Node.js, PostgreSQL, to name a few.

I excel at optimizing applications for efficiency, ensuring they are both scalable and easy to work on. I have a strong aptitude for leading and mentoring junior engineers, fostering a collaborative and innovative environment. My commitment to continuous learning and staying updated with industry trends allows me to integrate cutting-edge technologies into projects, driving the success of the teams and companies I work with.

EXPERIENCE

Frontend Engineer

Tensfer

2022 - Present FCT, Nigeria.

- Leading a team of 2 junior engineers to design and develop the company's dashboard using best practices.
- Researched and found out ways to optimize the dashboard operations to prevent memory leaks with could be costly in the long run.
- Developed a widget that connects the dashboard to an external app to get customer balances and transactions and aggregate them in one portfolio.
- Developed the API documentation website and Blog website.
- Developed the company's website and ensured implementation of the best SEO practices to ensure easy Google crawling.
- Conduct code reviews and provide feedback to junior engineers to enhance code quality and maintainability.
- Implemented a logging and monitoring system to track application performance and diagnose issues in real time.
- Collaborate with UI/UX designers to develop intuitive and responsive UIs, improvement customer engagement.
- Manage the deployment pipeline using CI/CD tools to ensure efficient release cycles.
- Technology used: React, Typescript, Next.JS, Redux toolkit, React query, Strapi, PostgreSQL, Docker, Heroku, Prisma.

PERSONAL PROJECTS

CryptoWorld

🔗 github.com/damilola1ade/cryptoworld
